INDUSTRIAL DISPUTES, AUSTRALIA, JUNE QUARTER 1979

OF NEW-SOUTH WALES

INQUIRIES

If you want to know more about these statistics ring Mr Geoff Winter on Canberra 526576 or our State office, or write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616
For copies of this publication contact Information Services, Canberra 526627 or State offices.

MAIN FEATURES

NOTE: The statistics contained in this publication refer to industrial disputes involving stoppages of 10 man-days or more.

In the three months ended June 1979 1,967,600 working days were lost, compared with 791,700 in the June quarter 1978 and 410,800 in the June quarter 1977.

For disputes which ended in the June quarter 1979 –

- 47 per cent lasted for one day or less. These disputes accounted for 88 per cent of total workers involved and 64 per cent of total working days lost (Table 3);
- A dispute in June, involving employees throughout Australia in various industries over the arrest of union officials in Western Australia, accounted for 84 per cent of total workers involved and 63 per cent of total working days lost in the quarter (Table 4);
- 67 per cent of all disputes were settled by resumption without negotiation. These disputes accounted for 96 per cent of total workers involved, and 80 per cent of total working days lost (Table 5).

EXPLANATORY NOTES

Introduction

This publication contains quarterly statistics of industrial disputes. Monthly figures for the period have previously been published in less detail in the monthly publication *Industrial Disputes* (6321.0).

2. The quarterly statistics of industrial disputes according to duration, cause, method of settlement, analysis by number of workers involved, and analysis by total working days lost shown in Tables 3 to 7 refer to disputes which ended in the quarter. They may differ from quarterly figures in Tables 1 and 2 in which figures for workers involved and working days and wages lost refer to all disputes that started or were in progress during the quarter, irrespective of whether they had ended during the quarter or continued into the next period. The figures for number of disputes in these tables, however, relate only to disputes which commenced during the quarter (see paragraph 7). Following a review of the statistics in this publication, it is expected that some changes will be incorporated, and revisions made where necessary, in the next issue.

3. The statistics of industrial disputes are compiled according to the Australian Standard Industrial Classification (ASIC), described in the ABS publication *Australian Standard Industrial Classification (Preliminary Edition)*, 1969, Vol. 1.

4. The statistics relate only to disputes involving stoppages of work of ten man-days or more at the establishments where the stoppages occurred.

5. The figures of working days and wages lost relate to the losses due to industrial disputes (as defined in paragraph 9). They may not relate to aggregate losses for the economy as a whole. For example, effects on other establishments, such as stand-downs because of lack of materials, disruption of transport services, power cuts, etc. are not measured by these figures. Also, some workers involved in industrial disputes may obtain work at other establishments while a dispute is in progress. It is also possible that some or all of the total man-days and wages lost in any particular dispute may be made up through working longer hours or increasing the work force at other establishments, or at the establishments involved in the dispute after work has resumed.

6. Reports of stoppages of work are obtained from (a) employers and trade unions, (b) government departments and authorities, (c) State and Federal industrial arbitration authorities, and (d) trade journals, employer and trade union publications and newspapers. The statistics of industrial disputes are compiled mainly from data obtained from employers (both private and government) and trade unions concerning individual disputes and from reports of government authorities. Particulars of some stoppages (for example, those involving a large number of establishments) may have been estimated and the statistics therefore should be regarded as giving only a broad measure of the extent of industrial disputes (as defined).

7. Stoppages of work occurring at different times and at different establishments, but due to the same cause, may be regarded as one industrial dispute. However, an industrial dispute occurring in more than one State or Territory is counted as a separate dispute in each State or Territory. A dispute involving workers in more than one industry in a State or Territory is counted only once in the number of disputes – in the industry that has the largest number of workers involved; but workers involved, working days lost and estimated loss in wages are allocated to their respective industries. Disputes not settled at the end of a year are included as new disputes in the figures for the following

year. Disputes not settled at the end of a quarter are not counted in the number of disputes for the following quarter (except as above), but additional workers involved and working days and wages lost are included. Therefore average days lost per worker involved on a quarterly basis are not comparable with the yearly averages.

8. For statistics of industrial disputes for earlier periods see *Labour Statistics 1977* (6101.0) and earlier issues of this publication.

Definitions

9. For these statistics an *industrial dispute* is defined as a withdrawal from work by a group of employees or a refusal by an employer or a number of employers to permit some or all of their employees to work, each withdrawal or refusal being made in order to enforce a demand, to resist a demand, or to express a grievance. Stoppages of work not directly connected with terms and conditions of employment (e.g. political matters, fining and gaoling of persons) are included in the statistics.

10. *Workers directly and indirectly involved* refer to wage and salary earners only. Excluded are persons who are self-employed (e.g. building sub-contractors, owner-drivers of trucks) and employers.

11. *Workers directly involved* are those who actually participated in the dispute in order to enforce or resist a demand or to express a grievance.

12. *Workers indirectly involved* are those thrown out of work at the establishments where the stoppages occurred, but who are not themselves parties to the dispute. Workers thrown out of work at establishments other than those where the stoppages occurred are excluded. (See paragraph 5.)

13. *Total workers involved* for any period of time are obtained by adding together the number of workers involved in each dispute in the period. For any period of time the figures may include details of the same workers involved in more than one dispute. The longer the period of reference the more chance there is of some double counting in the number of workers involved. Where there are varying numbers of employees involved during the progress of a dispute the figures of workers involved included in the statistics relate to the maximum number of individual workers involved.

14. *Working days lost* refer to man-days lost by workers directly and indirectly involved in the dispute and figures are generally as reported by parties to the dispute. For some disputes working days lost are estimated on the basis of the number of workers involved and the duration of the dispute.

15. *Estimated loss in wages* represents the amount of wages and salaries lost by workers directly and indirectly involved in the dispute and the amount is generally reported by parties to the dispute. In some cases the loss in wages is estimated on the basis of

working days (or hours) lost and the estimated average daily (or hourly) wage or salary of the employees involved. For some disputes there is no loss in wages.

Causes

16. The statistics of causes of industrial disputes relate to the *direct causes of stoppages of work*. The statistics therefore do not reflect the relative importance of all causes of dispute between employers and employees. The classification of causes is as follows:

Wages. Claims involving general principles relating to wages (e.g. increase (decrease) in wages; variation in method of payment) or combined claims relating to wages, hours or conditions of work (in which the claim about wages is deemed to be the most important).

Hours of work. Claims involving general principles relating to hours of work (e.g. decrease (increase) in hours; spread of hours).

Leave, pensions, compensation provisions, etc. Claims involving general principles relating to holiday and leave provisions; pension and retirement provisions; workers' compensation provisions; insertion of penal clause provisions in awards; etc.

Managerial policy. Disputes concerning the managerial policy of employers — computation of wages, hours, leave, etc. in individual cases; docking pay, docking leave credits, fines, etc.; disciplinary matters including dismissals, suspension, victimisation; principles of promotion and filling positions, transfers, roster complaints, retrenchment policy; employment of particular persons and personal disagreements; production limitations or quotas; etc.

Physical working conditions. Disputes concerning physical working conditions — safety issues; protective clothing and equipment; first aid services; uncomfortable working conditions, etc.; lack of, or the conditions of, amenities; claims for assistance; shortage or poor distribution of equipment or material; condition of equipment; new production methods and equipment; arduous physical tasks; etc.

Trade unionism. Disputes concerning — employment of non-unionists; inter-union and intra-union disputes; sympathy stoppages in support of employees in another industry; recognition of union activities; etc.

Other. Disputes concerning — protests directed against persons or situations other than those relating to the employer/employee relationship, i.e. political matters, fining and gaoling of persons, protests against lack of work, and lack of adequate transport; non-award public holidays; accidents and funerals; no reason given for stoppages; etc.

Methods of settlement

17. Statistics of the *method of settlement* of industrial disputes relate to the *method directly responsible for ending the stoppage of work* and not necessarily to the method (or methods) responsible for settling all matters in dispute. For these reasons they do not reflect the relative importance of the work of authorities operating under State and Federal legislation. The classification of methods of settlement is as follows:

Negotiation. Private negotiation between the parties involved, or their representatives, without the intervention or assistance of authorities constituted under State or Federal industrial legislation.

Mediation. The arbitration or mediation of persons whose intervention or assistance is not based on State or Federal industrial legislation.

State legislation

- (a) Under State conciliation and arbitration or wages board legislation. Intervention or assistance of an industrial authority or authorities created by or constituted under State conciliation and arbitration or wages board legislation, or reference to such authorities or compulsory or voluntary conference.
- (b) Under other State legislation. Intervention, assistance or advice of State government officials or inspectors.

Federal and joint Federal-State legislation

- (a) Compulsory or voluntary conference or by intervention or assistance of, or reference to, the industrial tribunals created by or constituted under the following Acts : (i) Conciliation and Arbitration Act, (ii) Coal Industry Acts, (iii) Stevedoring Industry Act, (iv) Other Acts (Snowy Mountains Hydro-electric Power Act; Navigation Act; and the Public Service Arbitration Act).
- (b) Intervention, assistance or advice of Federal government officials or inspectors.

Filling the places of workers on strike or locked out.

Closing down the establishment permanently.

Resumption without negotiation.

Other methods.

18. All current publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.
